Dear HSH Donor,

I love plants and gardening, but not sure if I will ever have the opportunity to have my own garden. The idea of a hydroponics system or plant lights seems like a great way to bring the outdoors inside. I do love fun candles (sweet smells), one day soon, I look forward to my own space where I can display them. A simple black belt would be very useful and much needed for some pants that I own. Comfortable runners would be lovely, my feet are often sore at the end of the day. I wear a size 10.

Thank you very much!

Dear Santa and the HSH Donor,

I would love some ear buds as I did lose mine a few months ago and I like wearing them to help me sleep. I spend a lot of time on my computer and the wire of my gaming mouse is taped up because it's coming apart. It's a really cool mouse, and I am worried that it will break soon. For my computer I would really like to have a gaming mouse pad. It's a long pad that goes under the keyboard and is really long and sometimes they even plug in and light up. I really love baseball and the blue jays.

Thank you so much!

Wish List Letter (Child 2)

Dear HSH Donor,

I am a student in college, and I really like board games that are new and different. I have monopoly and some classic games, but always like to try new card and board games to play with my mom and brother. Going to and from school all the time, I like to listen to podcasts or music on the go train, but I lost one of my ear buds. I still have one but would really like to have a full set again to listen to. I have a new passion for golf, so I love anything golf (I am left-handed). It would be cool to have a waterproof Bluetooth speaker for the shower. My mom is always worried I will ruin my phone because I take it with me to play music in the washroom, so this will make sure that she does not have to worry anymore because the music will connect without bringing it with me.

Thank you so much and I really do appreciate your consideration for me and my family.
